

# Line Boring

Schlam Engineering's precision line boring capability forms part of our complete service offering and enables us to resolve machining challenges in the field. The service is mobile with a fleet of units that meet mine site specifications so we can come to you 24/7 no matter where you are located across WA.

## Capability

Our line boring service is available in the field across the state and is supported by our workshop facilities in the Perth Metro, South and North West. Our fully qualified technicians are equipped to assist you with mining and earthmoving equipment repairs with services including:

- Bore Machining 40mm – 750mm
- Gantry Milling
- ID and OD welding
- Facing
- Drilling & Tapping
- Bush Removal & Installation
- Disassembly & Assembly

## Results delivery

Precision line boring is an essential maintenance service and ensures Schlam can complete the full cycle of maintenance and repairs for your equipment. All of our work is completed to the highest standard and our management systems and processes are ISO 9001 accredited in line with industry best practice.
