

Maintenance

Schlam provides wear management planning, inspections, preventative maintenance and breakdown repair services. We offer these services as one off projects or within a Maintenance and Repair Contract (MARC) agreement. We have a long and successful history in providing mobile and fixed plant maintenance services. We safely improve your productivity.

“Schlam can be relied on to help you get the most out of your equipment, regardless of the operational conditions. They have a good eye for detail and the flexibility to achieve sound problem solutions.”

Mine Maintenance Manager
Newmont

Capability

Our maintenance services are based on:

- Wear management systems, techniques and materials expertise
- 24 hour emergency breakdown and repair teams
- Use of the latest in welding equipment technology and finest materials from a proven supply chain
- The ability to handle machinery and components weighing up to 100 tonne at our main workshop
- Our “can do, will do, done safely” ethos
- Our Safety Management System and ISO Quality System

Results delivery

We tailor service requirements based on the job complexity and can offer individual trade personnel or a team of supervisors, coded welders, welding inspectors and trade personnel, to meet our client needs.
