

# HV Electrical Services

Schlam Engineering provides HV Electrical Services to the Resources, Industrial and Construction industries. Providing site services since 2004, our team of Electrical technicians operate 24/7. Whether it's a standalone electrical project or electrical services scope combined within a plant shutdown – we have you covered.

## Capability

With our service centre workshops located in both the South West and Northwest, we are able to respond to your needs quickly. Schlam Electrical services include:

- Test and Tag, emergency/exit light testing
- Transformer installation and commissioning, substation earth testing
- Thermal imaging services
- Air conditioning installation and servicing
- Industrial stadium lighting projects
- Powerline relocations, maintenance, inspections and installations
- Pump refurbishments and dewatering services
- HV Trailing cable relocations
- Data installations
- Management of electrical assets to ensure compliance with current electrical and mines regulation acts.

## Results delivery

Schlam offers a full cycle service from design and installation to monitoring and maintenance of your equipment, removing the need for multiple contractors. All of our work is completed to the highest standard and is ISO 9001 accredited, ensuring minimised costs and enabling production to be maintained as efficiently as possible.
